Wordmark

The word mark is both a core element in implementing a company's identity and the most important factor in forming the overall image of a company. The word mark of LS is the key design element that symbolizes and represents LS most extensively. Therefore, the rules and principles of word mark application must be observed at all times so that the image of the company is not damaged by distortion, modification, misuse or abuse, etc.

The Meaning of the Word Mark

The new word mark of LS symbolizes the company's vision and will to implement an independent corporate identity, to strengthen global competitiveness and to lead the market in the future. The arrow point symbolizes the company's strong will to advance into the future as well as to achieve dominant competitiveness as a new paradigm shaper of the industry. It also represents the company's vision to be a 'world best leading solution company'. The red color symbolizes LS' spirit to challenge and realize a progressive mindset, while the smooth lines of the rounded gothic font implies LS' resolution to exert its' best effort to satisfy customers in order to 'realize the best customer satisfaction'. The blue color symbolizes LS' expertise, transparency and integrity.

Clear Space

To maintain the design characteristics of the word mark, a prescribed area of space around it must be secured as clear, uninterrupted space. Use of auxiliary graphic elements and background colors must be refrained from inside the clear space. Therefore, before word mark development, the position setting and securing of clear space must be completed first. To prevent distortion of the word mark during use, use playback data in this manual or the script found in the CD-Rom by expanding or reducing it proportionately.

The deal is part of a project that the Korea International Cooperation Agency (KOICA) under the Foreign Ministry is conducting to modernize Iraq's communications network, it said. Under the contract, LS Cable will construct a high-speed, optical-fiber network linking Baghdad University and 18 other colleges. The network will then be connected to an international communications network via satellite, allowing the universities to get access to the Internet, data communications and other multimedia services, LS Cable said. Work will begin as soon as consultation with KOICA over security problems is complete, the company said. LS Cable said it will make greater efforts to win more contracts to rebuild Iraq's communications network, making it a springboard for its advance into the Middle East market. LS Cable is the largest cable producer in South Korea with a market share of 35 to 40 per cent. Currently, about 2,800 South Korean troops are stationed in the Kurdish-controlled town of Irbil in northern Iraq, making the country the biggest U.S. coalition partner after Britain.

Wordmark Application Type A For 3mm or more

Word mark application 'Type A' is used to improve readability in case the basic word mark is reduced for promotional applications as well as for printing and image materials measuring 3mm or more and 10mm or less in length.

* Actual size

Wordmark Application Type B For 500mm or more

Word mark application 'Type B' is used to prevent distortion by distance and to maintain readability for outdoor "uper-graphics" applications measuring 500mm or more, or when producing a large-sized signage system, etc.
(From the basic word mark, the font should be somewhat bolder and the arrow enlarged.)

Color System

The colors of the logo and all CI graphics are the first to be recognized among all the graphic elements and constitute a key part of the corporate identity. Therefore, use of LS Blue and LS Red, the basic colors, must be executed accurately and consistently according to the color use specifications outlined in the manual.

Primary Colors

	Printed Spot Color	Process Color	RGB Color	LG Film Color For lighting	LG Film Color For non-lighting

Metallic Colors

Silver

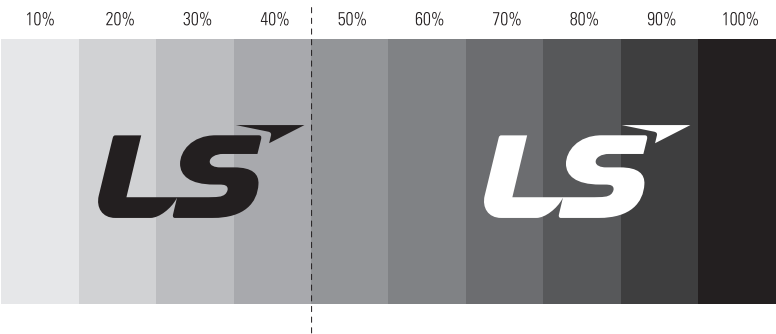

Gold

Color Variations A

Color variation 'A' prescribes acceptable color expression methods for the word mark according to the brightness of the background color and spot color use.

Black and white variations

In case of black 40% or higher, the word mark can be expressed as a negative.
Negative expression is possible in a number of ways, such as by using white, black 20% (tone down) or metallic hues.

Silver/Gold variations

Word mark expressed with gold foiling on gold background

Word mark expressed with silver foiling on silver background

Word mark expressed with gold 1 on black background

Word mark expressed with silver 1 on black background

Word mark expressed with gold foiling on white background

Word mark expressed with silver foiling on white background

Color Variations B

Color variation 'B' prescribes acceptable color expression methods for the word mark according to the background color. Colors must be controlled accurately when used on a word mark. Modified use of colors is the major cause of image distortion or deterioration of communication effects. Therefore, the variation rules must be strictly observed.

	Type A (white)	Type B (White+Red)	Type C (Blue+Red)	Type D (Black)
White				
LS Blue				
LS Red				
Emerald Green				
Light Blue				
Cool Gray				
Yellow				

Type A : Use of white is prohibited if the background color is lighter than 40% ink.

Type B : Use of Type B is prohibited if the background color is lighter than 40% ink or if the background color interferes with the red point color.
(However, Type B can be limitedly used for signage and video media.)

Type C : When using the designated colors of the logotype, use of Type C is prohibited when either of the two colors is not clearly distinguished from the background color.

Type D : Use of black is prohibited if the background color is darker than 50% ink.

Color Variations C

Color variation 'C' prescribes acceptable color expression methods for the word mark according to the background color. Colors must be controlled accurately when used on a word mark. Modified use of colors is the major cause of image distortion or deterioration of communication effects. Therefore, the variation rules must be strictly observed.

	Type A (white)	Type B (White+Red)

(However, Type B can be limitedly used for signage and video media.)

Type C : When using the designated colors of the logotype, use of Type C is prohibited when either of the two colors is not clearly distinguished from the background color.

Type D : Use of black is prohibited if the background color is darker than 50% ink.

Signature Rule Korean, English

The combination rules of Korean and English letters for the LS word mark are applied when both the word mark and logotype need to be marked in the same space. To prevent distortion of the logotype, the required clear space outlined in this manual or the script in the CD-Rom must be enlarged or reduced proportionately.

LS전선 Clear Space

LS Cable & System Clear Space

Signature Rule Chinese

The combination rules for Chinese characters of the LS word mark are applied when both the word mark and logotype need to be marked in the same space. To prevent distortion of the logotype, the required clear space outlined in this manual or the script in the CD-Rom must be enlarged or reduced proportionately.

LS电缆 Clear Space

LS红旗电缆 Clear Space

Signature Rule Mixed

This rule applies when the LS signature, department name and English logotype need to be marked in the same space. To prevent distortion of the logotype, the required clear space outlined in this manual or the script in the CD-Rom must be enlarged or reduced proportionately.

Incorrect Usage

Examples of incorrect uses of the LS word mark are listed here. The LS word mark must be used by following the appropriate type and color-related rules according to the application medium.

	A)	Use of outlines or borders around the word mark is prohibited.
	B)	The word mark must not be used on top of a complicated background.
	C)	Colors must not be changed randomly except for a few that are approved. Refer to color use in this manual.
	D)	Proportions and shapes of the word mark must not be distorted or modified.
	E)	Halftones must not be visible when using a single-color word mark.
	F)	The word mark must not be used on top of complicated photographs or graphics.
	G)	The product name must not be marked next to the word mark.

Typeface-Korean

The preferred Korean typeface for LS is gothic Yunseo. This Korean font is not a specified rule, but a recommendation. In principle, the font is preferentially applied to printing of corporate-level documents and forms. In case the font is not available, it is possible to use other similar fonts.

Graphic Motif A

For graphic motifs, the visual image of LS must be maintained uniformly. Graphic motifs serve an important role of assisting the public to recognize LS. The LS motif has been developed by diversifying images of the word mark. At application, the appropriate graphic motif must be selected to suit the characteristics of the application medium.

Brand line motif for internal use (i.e. forms)

When background color is light

When background color is dark

The most representative line motif of LS

For forms, the thickness of lines is prescribed to be 0.5 ~ 1mm and applied to each prototype.

Brand motif for vehicles

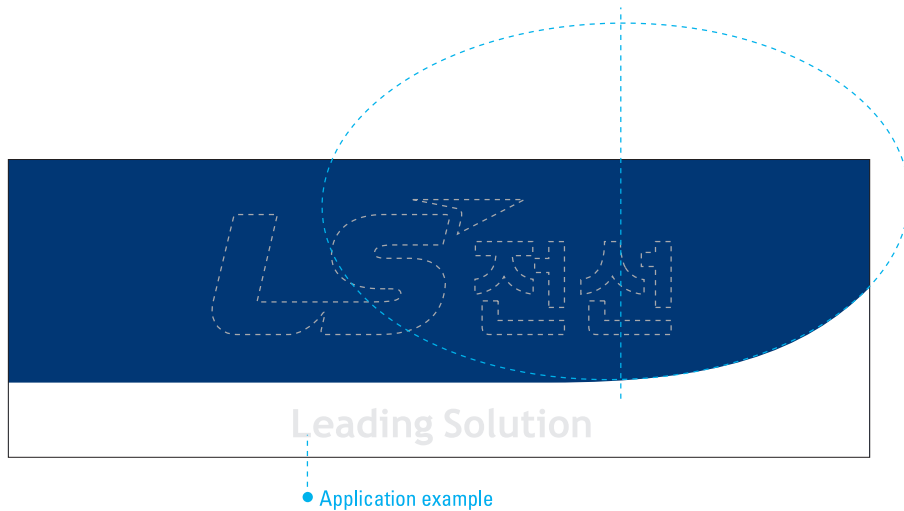

The angle of graphic motifs is adjusted according to the shape of the vehicle applied. The optimal shape must be selected and used. In case a red line motif ❶ is deleted, the graphic can be applied to packages by increasing the scope of use.

Graphic Motif B

For graphics, the visual image of LS must be maintained uniformly. Graphic motifs serve an important role of assisting the public to recognize LS. The LS motif has been developed by diversifying images of the word mark. At application, the appropriate graphic motif must be selected to suit the characteristics of the application medium.

Brand motif for outdoor advertisements (i.e. billboards)

Graphics are appropriately adjusted according to the shape or proportion of the outdoor advertisement. Applied elements are effectively expressed by using the designated fonts for the word mark, slogan, URL, etc.

Brand motif for outdoor advertisements (i.e. banners)

Graphics are appropriately adjusted according to the shape or proportion of the outdoor advertisement. Applied elements are effectively expressed by using the designated fonts for the word mark, slogan, URL, etc.

Pattern

In principle, the basic pattern must be used. Patterns are especially used in promotions. It is effective to use patterns in advertisements and publicity materials of LS.

Applied to LS Group's promotions

The basic pattern is added vertically according to the basic proportions. At application, a pattern is randomly enlarged sideways or vertically in order to prevent the images of the motif ❶ from overlapping or becoming distorted.

Applied to LS Group's promotions

The basic pattern is added vertically according to the basic proportions. At application, a pattern is randomly enlarged sideways or vertically in order to prevent the images of the motif ❶ from overlapping or becoming distorted.

Printing Method : Spot color printing

Award and Cover

Awards and cards for written appointments, etc. are issued to specific people and purposes. Symbolizing the authority and reliability of LS, invitation cards must be printed in a manner that upholds the honor of the company. When ordering invitation cards the specifications, colors and design outlined in this section must be carefully followed.

Type A

Type B

Specifications

Size : Text paper : 210mm x 297mm

Cover : 220mm x 310mm

Material and Printing Method: Offset printing on white paper (200g or more)

Cover : Type A, Gray velvet processing and tooling

Type B, Dark blue velvet processing and tooling

Cover of Approval

Covers of approval are used internally for efficient management of business forms. When ordering covers of approval the specifications, colors and design outlined in this section must be carefully followed.

Type A

Type B

Specifications
Size : 220mm x 310mm
Material and Printing Method :
Printing on synthetic leather or equivalent
material and tooling

Badge

Badges are worn by all employees to prove their status as either managers or employees of LS. Badges assist in communication among employees and enhance their sense of solidarity, cooperative spirit and sense of belonging to the company.

Type A

Type B

Manufacturing Method :
Gold or silver plating on a brass frame and
painted in designated colors

Name Tag

Name tags are worn by all employees as an item to prove their status as either managers or employees of LS. Name tags assist in communication among employees and enhance their sense of solidarity, cooperative spirit and sense of belonging to the company.

Type A

Type B

Specifications

Size : Type A : 67mm x 27mm

Type B : 63mm x 17mm

Material : Molding or made with acryl

Printing Method : Offset printing

ID Card

ID cards are the medium that prove the status of managers and employees of LS. ID cards play an important role in increasing employees' sense of belonging to the company and solidarity. The front of the ID card bears a photograph and name of the wearer. When ordering ID cards the specifications, colors, materials and positions specified must be carefully followed.

Type A

Type B

Specifications

Size : Types A & B : 53mm x 86mm

Material and Printing Method :

Silver (Pantone 877C) or designated colors on a plastic card

Visit Card

Visitor cards are issued temporarily to visitors. When ordering visitor cards the specifications, colors, materials and positions specified must be carefully followed.

Type A

Type B

*Reduced by 80%

Specifications

Size : Types A & B : 53mm x 86mm

Material and Printing Method :

Silver (Pantone 877C) or designated colors on a plastic card

Parking Permission

Parking permits are issued for limited periods of time to visitors. When ordering parking permits the specifications, colors, materials and design outlined in this section must be thoroughly followed.

Type A_Card type

Type B_Sticker type

Specifications

Size : Type A : 53 x 86mm

Type B : 42 x 42mm

Material and Printing Method

Type A : Silver (Pantone 877C) or designated colors on plastic card

Type B : Designated colors printed on sticker paper

Flag

Flags are a symbol that represents the image of LS both within and outside the company. Flags symbolizing the honor of LS are placed in official venues of the company such as directors' offices or conference rooms.

Formal flag

Type A

Type B

Type C

Informal flag

Type A

Type B

Type C

Specifications

Formal flag

Size : 1350 x 900mm

Material : White velvet (Veludo)

Manufacturing Method : Computer embroidery with tassels
woven into three rows of golden thread

Informal flag

Size : 1350 x 900mm

Material : Polyester

Manufacturing Method : Textile printing

Helmet

Helmets help protect the heads of employees and visitors against accidents at factories and also help employees engender a sense of pride and solidarity. In addition, the helmet is a medium that delivers a unified image of LS both internally and to the public. Therefore, helmets must be kept clean to enhance work efficiency.

Type A

Type B

Printing Method : Silk printing

Wrapping Paper

While wrapping contents, wrapping paper also publicizes the image of LS internally and to the public by drawing attention. Different colors and paper materials can be used according to the purpose of use. However, modification of the basic elements is prohibited.

Type A

Type B

Specifications

Size : To suit the requirement purpose

Paper : White package paper (80g or more)

Printing Method : Spot color printing

Type A : Pantone 429C, color 50%

Type B : Pantone 281C, black 20%

Shopping Bag

Shopping bags are used for caring products and souvenirs. They also function as an item that promotes the image of LS. Different sizes, colors and paper materials can be used according to the intended purpose. However, in principle, the 3 types specified in this section should be used preferentially. The design guidelines for shopping bags are not rules, but recommendations. Therefore, they can be somewhat modified in case different designs are required. However, it is necessary to obtain confirmation from the management division with regards to use of the CI.

Type A

Type B

Type C

Specifications

Size : 420mm x 290mm x 90mm

Paper : White paper or art paper (250g or more)

Printing Method : Spot color printing or offset printing

designated colors and fixed in
position with brackets
Type B : Internal Panaflex lighting

Welcome Sign

Welcome signs greet visitors to LS Cable & System and serve the role of delivering a positive image of LS Cable & System. For manufacturing and installation, the proportions and dimensions of each sign must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated galvanized steel,
cut-out letters, opaque laminated sheets

Information Sign A

Information signs are installed at the base of stairs or elevators to draw attention. For manufacturing and installation, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated galvanized steel,
opaque laminated sheet,
opaque chrome wall, cut-out letters

Information Sign B

Information signs are installed at the base of stairs or elevators to draw attention. For manufacturing and installation, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated galvanized steel,
opaque laminated sheet,
opaque chrome wall, cut-out letters

Notice Board A

Notice boards are designed to temporarily post publicity notices or printed materials of other purposes. For manufacturing and installation, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated galvanized steel,
opaque laminated sheet, acryl

Notice Board B

Notice boards are designed to temporarily post publicity notices or printed materials of other purposes. For manufacturing and installation, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Floor Main Sign

Installed at each entrance, main floor signs serve the role of publicizing LS Cable& System to employees and visitors. For manufacturing and installation, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application. Main floor signs are available in both Korean and English.

Main floor sign in Korean

Main floor sign in English

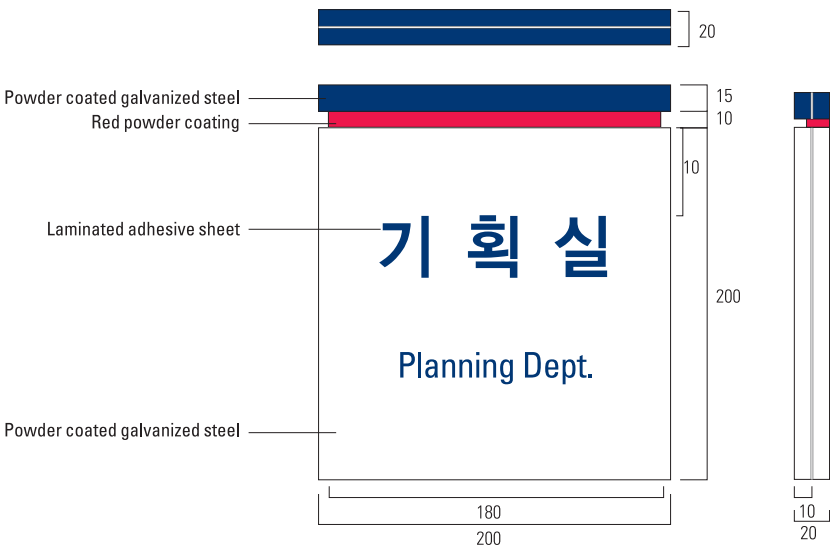

Materials : Powder coated galvanized steel,
cut-out letters

Department Sign

Department sign are installed at the tops of side walls along the entrance. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Adhesive

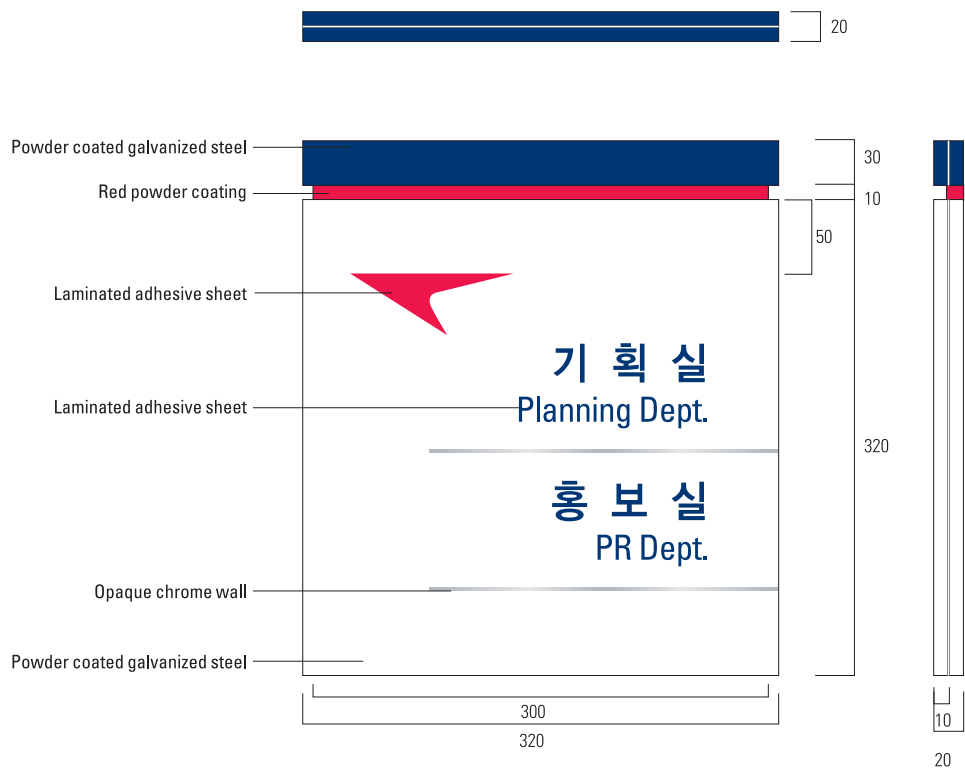

Projected type

Materials : Powder coated galvanized steel,
opaque laminated sheet

Dept. Direction Sign

Dept. direction sign is installed at the top parts of side walls along the entrance. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated galvanized steel,
opaque laminated sheet,
opaque chrome wall

Pictogram

Pictograms are elements that affect the interiors and exteriors of buildings and therefore must be expressed clearly. For manufacturing, the proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated galvanized steel,
opaque laminated sheet

Window Graphic

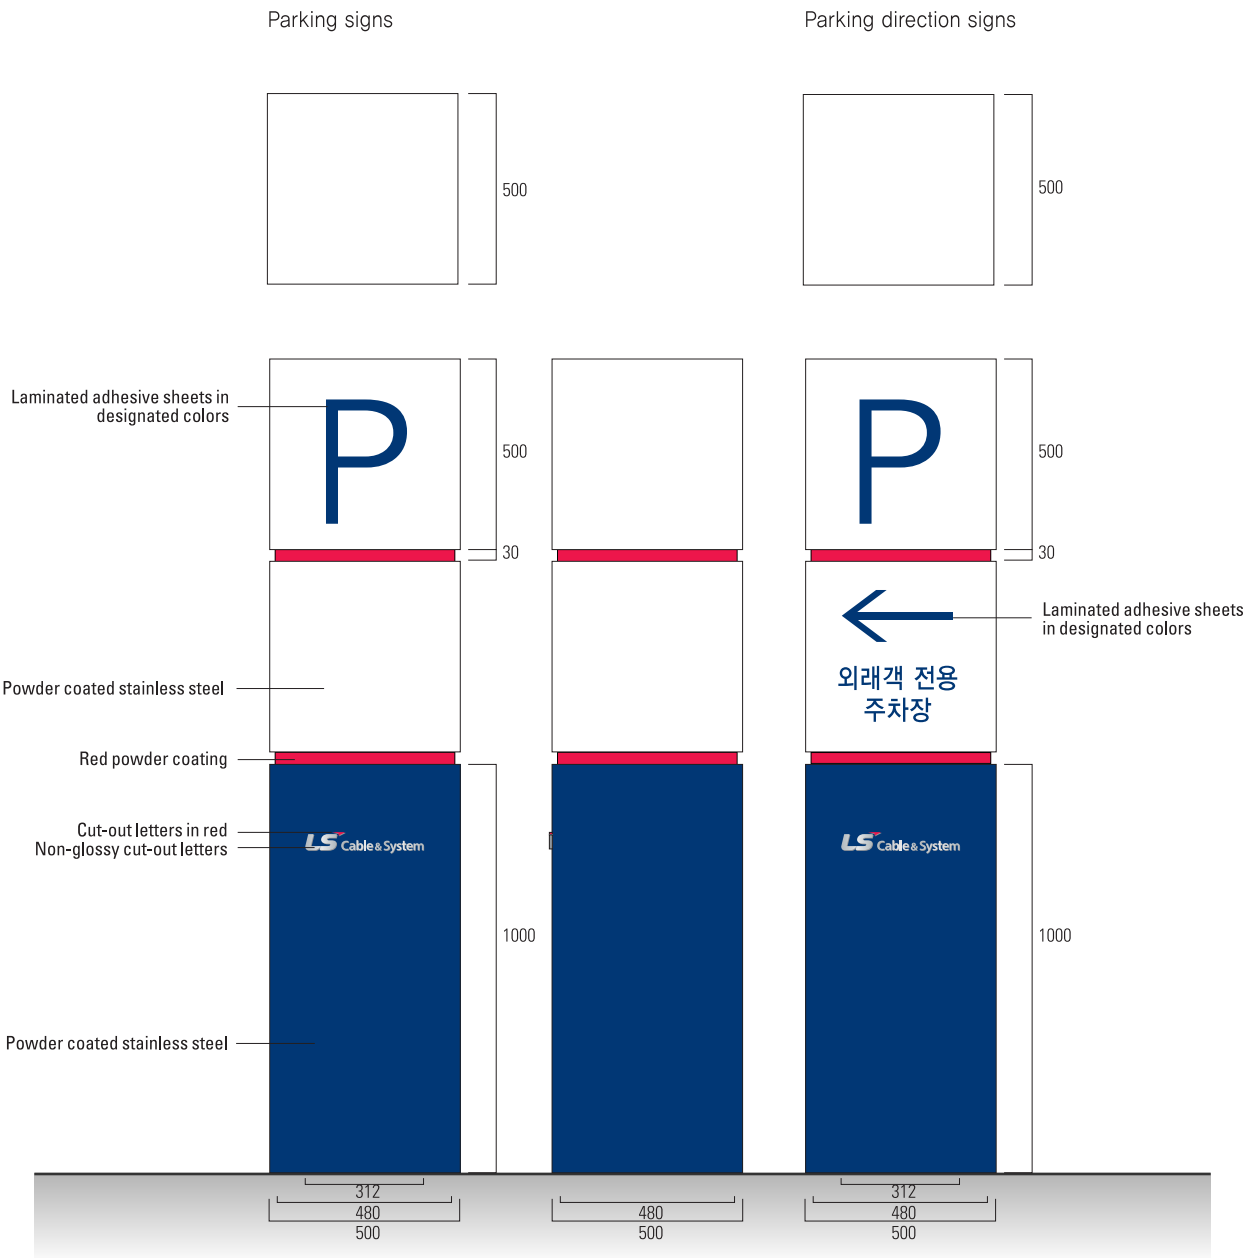

Window graphics affect building interiors and exteriors and therefore must be expressed clearly. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Etched, opaque laminated sheet

Parking Sign

For manufacturing and installation, proportions and dimensions of parking signs must be sized according to the examples given in this section to suit the conditions of the application.

Outside Directional Sign

Outdoor signs are an important element that delivers the image of LS Cable & System. Therefore, attention must be paid to achieve accurate expression. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application. Word mark 'B' is used when the size of the word mark is 500mm or more.

Materials : Powder coated stainless steel,
painted in designated colors

Directional Sign

Directional signs are installed outdoors and serve an important role of delivering the image of LS Cable & System. For manufacturing, proportions and dimensions of each signage must be sized according to the examples given in this section to suit the conditions of the application. Arrow points for directions are used only when left and right directions are required. Arrows are used for up and down directions and for directions at an angle, such as 45°.

Materials: Powder coated stainless steel,
cut-out letters,
opaque laminated sheets

Main Sign

Main signs serve an important role of delivering the image of LS Cable & System to the outside. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated stainless steel,
cut-out letters,
opaque laminated sheets

Wall Sign

Wall signs serve an important role of delivering the image of LS Cable & System to the outside. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated stainless steel,
cut-out letters,
opaque laminated sheets

Dept. Directional Sign

Dept. directional signs are designed in the shape of a hanger for installation at worksites. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : 20mm Fomex,
opaque laminated sheet

Wall Sign A

Wall signs are an important element that delivers the image of LS to the outside. Therefore, attention must be paid to achieve clear and accurate expression. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Type A

Type B

Type C

Type D

Wall Sign B

Wall signs are an important element that delivers the image of LS to the outside. Therefore, attention must be paid to achieve clear and accurate expression. Warning Sign

Warning signs are designed and installed for the safety of employees at worksites. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application.

Materials : Powder coated stainless steel,
opaque laminated sheets

Chimney

The word mark applied to smokestacks is an important element for delivering the image of LS to the outside. Therefore, attention must be paid to achieve accurate expression. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application. Only two word marks of LS Cable & System can be applied to a smokestack, one to the front and one to the back. Type 'B' is used when the size of the word mark is 500mm or more.

Facade Sign

Facade signs are an item that is most frequently exposed to the outside. They are an important element for delivering the image of LS to the outside. Therefore, attention must be paid to achieve accurate expression. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application. Type 'B' is used when the size of the word mark is 500mm or more.

Projecting Sign

Projecting signs are most frequently exposed to the outside. They are an important element for delivering the image of LS to the outside. Therefore, attention must be paid to achieve accurate expression. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application. Type 'B' is used when the size of the word mark is 500mm or more.

Shutter Graphic

Shutter graphics are most frequently exposed to the outside. They are an important element for delivering the image of LS to the outside. Therefore, attention must be paid to achieve accurate expression. For manufacturing, proportions and dimensions of signage must be sized according to the examples given in this section to suit the conditions of the application. Type 'B' is used when the size of the word mark is 500mm or more.

- 02 Mini Bus
- 03 Passenger Car
- 04 Van
- 05 Truck
- 06 Cargo
- 07 Forklift

BUS

Company vehicles function as a mobile advertising medium that delivers a company's image to the public. Therefore, careful attention must be paid to accurate and consistent expression of vehicle graphics and of the vehicles themselves so that the image of LS is successfully represented. Even vehicles of the same type may be different in their shapes or proportions according to the year of production or manufacturer. Therefore, while positions of marking elements can be adjusted according to the vehicle types listed in this section, the proportions themselves must not be altered. In case the color of the front and rear bumpers is black or dark gray, the original colors shall be used.

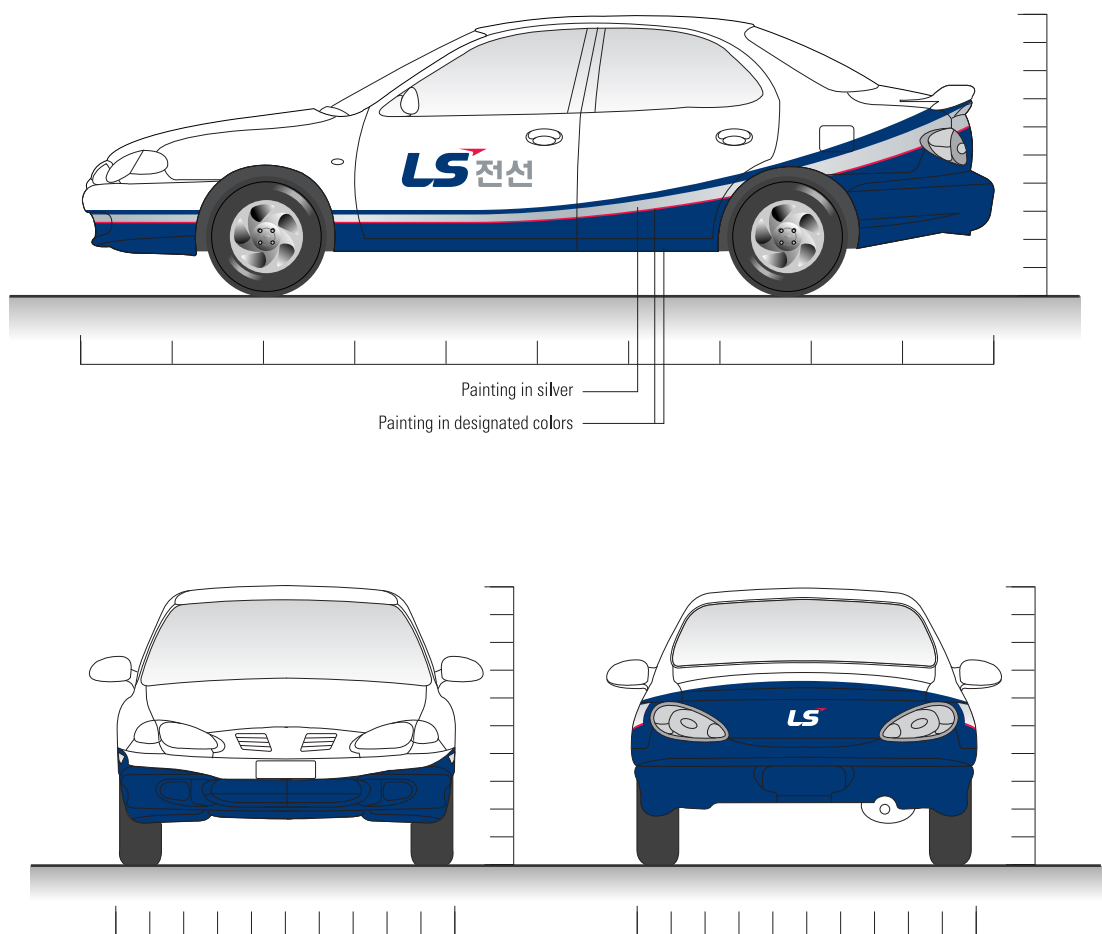

Mini Bus

Company vehicles function as a mobile advertising medium that delivers a company's image to the public. Therefore, careful attention must be paid to accurate and consistent expression of vehicle graphics and of the vehicles themselves so that the image of LS is successfully represented. Even vehicles of the same type may be different in their shapes or proportions according to the year of production or manufacturer. Therefore, while positions of marking elements can be adjusted according to the vehicle types listed in this section, the proportions themselves must not be altered. In case the color of the front and rear bumpers is black or dark gray, the original colors shall be used.

Passenger Car

Company vehicles function as a mobile advertising medium that delivers a company's image to the public. Therefore, careful attention must be paid to accurate and consistent expression of vehicle graphics and of the vehicles themselves so that the image of LS is successfully represented. Even vehicles of the same type may be different in their shapes or proportions according to the year of production or manufacturer. Therefore, while positions of marking elements can be adjusted according to the vehicle types listed in this section, the proportions themselves must not be altered. In case the color of the front and rear bumpers is black or dark gray, the original colors shall be used.

Van

Company vehicles function as a mobile advertising medium that delivers a company's image to the public. Therefore, careful attention must be paid to accurate and consistent expression of vehicle graphics and of the vehicles themselves so that the image of LS is successfully represented. Even vehicles of the same type may be different in their shapes or proportions according to the year of production or manufacturer. Therefore, while positions of marking elements can be adjusted according to the vehicle types listed in this section, the proportions themselves must not be altered. In case the color of the front and rear bumpers is black or dark gray, the original colors shall be used.

Truck

Company vehicles function as a mobile advertising medium that delivers a company's image to the public. Therefore, careful attention must be paid to accurate and consistent expression of vehicle graphics and of the vehicles themselves so that the image of LS is successfully represented. Even vehicles of the same type may be different in their shapes or proportions according to the year of production or manufacturer. Therefore, while positions of marking elements can be adjusted according to the vehicle types listed in this section, the proportions themselves must not be altered. In case the color of the front and rear bumpers is black or dark gray, the original colors shall be used.

Cargo

Company vehicles function as a mobile advertising medium that delivers a company's image to the public. Therefore, careful attention must be paid to accurate and consistent expression of vehicle graphics and of the vehicles themselves so that the image of LS is successfully represented. Even vehicles of the same type may be different in their shapes or proportions according to the year of production or manufacturer. Therefore, while positions of marking elements can be adjusted according to the vehicle types listed in this section, the proportions themselves must not be altered.
